Toledo-Lucas County Port Authority's Economic Impact on the Region presented by Joseph Cappel, VP. The first Port Authority established in Ohio in 1955 due to the opening of the St. Lawrence Seaway. The Port became the largest coal port in the world shipping 35,368,478 tons of coal in 1966. In the early 1970's the Port assumed operations of City of Toledo's two airports; Toledo Express Airport and Toledo Executive Airport. These facilities are home to dozens of businesses and services employing thousands of people. These facilities are home to dozens of businesses and services employing thousands of people.

The Port is the primary organization responsible for economic development in the region funding programs including Northwest Ohio Bond Fund; SBA 504 Loan Program, and other financing programs. The Toledo Shipyard was purchased in 1988. The historic yard has put thousands of people to work in our region over the years especially during the winter months when vessels go to dry dock for maintenance and repair work.

Other milestones include purchase of Central Union Plaza Train Station in 1994; opened new Amtrak facility in 1995; rededicated Dr. Martin Luther King, Jr. Plaza in 2001, developed National Museum of the Great Lakes in 2007, and relocated Greyhound to MLK Plaza

in 2017.

The Diversified Contractors Accelerator Program (DCAP) launched in 2010 to assist local minority and women-owned contractors in publicly bid and privately-owned construction projects in northwest Ohio. There are over 50 companies participating in this program today. INn2011 The Port Authority acquired City of Toledo owned parking garages and assumed on street parking operations in downtown Toledo.

To preserve our shipping channel and safe navigation in our Seaport, we created the Dredge Center of Innovation in 2016 to study how crops grow in dredge material. We have several initiatives underway to determine if the dredged material can be beneficially used in agricultural applications or in other projects throughout our community. This material should be considered a resource rather than a waste and our challenge will be finding good uses for this material moving forward.

The projects and services I have shown represent hundreds of millions of dollars of investment in the community. Many of them are directly tied to our transportation system and benefit our quality of life.

- Be Proactive
- Be Patient
- Develop public/private partnerships
- Be willing to take risk!!
